# INTRODUCTION

bienvenue sur CV maker votre plateforme en ligne pour créer des CV professionnels facilement.

# sign up page

# code en php :

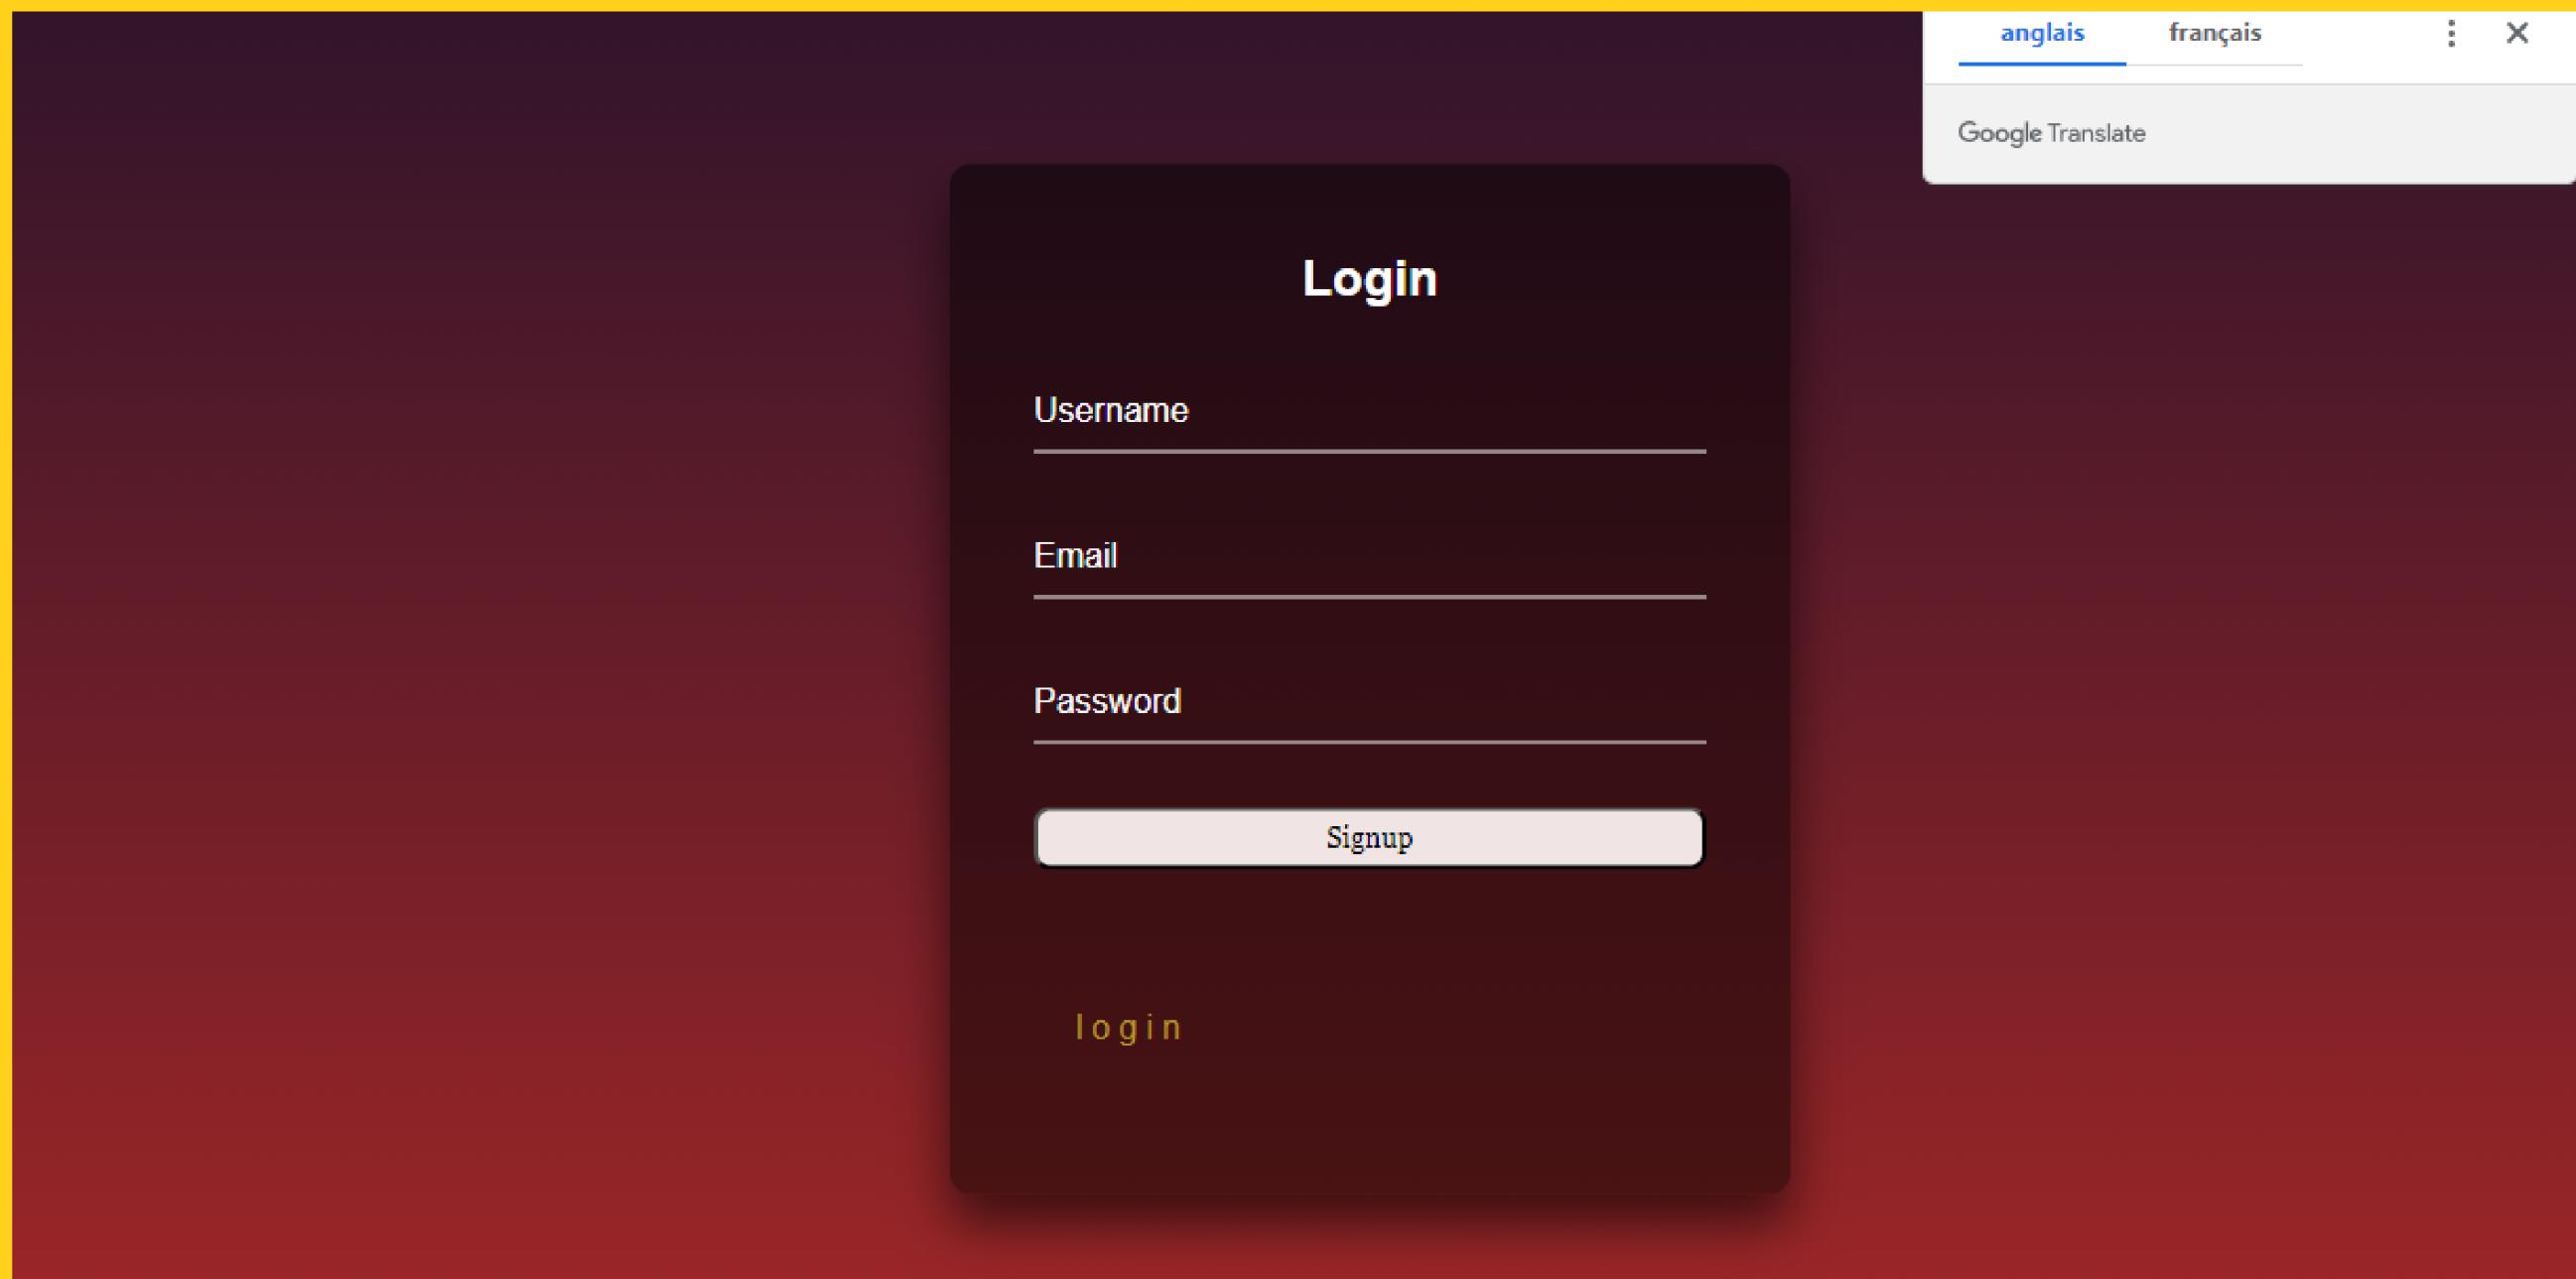

```
if ($_SERVER['REQUEST_METHOD'] === 'POST') {
    // Retrieve form data
    $username = $_POST['T1'];
    $address = $_POST['T2'];
    $password = $_POST['T3'];

    // Create user object
    $user = new User($username, $address, $password, $conn);

    // Call createUser method
    $user->createUser();

    header("location: switch.php");
}
```

# création de niveau utilisateur

# code en php:

```
require_once 'User.php';
include 'conecti.php';

if ($_SERVER['REQUEST_METHOD'] === 'POST') {
    // Retrieve form data
    $username = $_POST['T1'];
    $address = $_POST['T2'];
    $password = $_POST['T3'];

    // Create user object
    $user = new User($username, $address, $password, $conn);

    // Call createUser method
    $user->createUser();
```

# connexion avec base de données en php

```
try {
    $conn = new PDO("mysql:host=$server;dbname=$db", $username, $password);
    $conn->setAttribute(PDO::ATTR_ERRMODE, PDO::ERRMODE_EXCEPTION);
    return $conn;
} catch(PDOException $e) {
    echo "Connection failed: " . $e->getMessage();
    return null;
}

$conn = connect();
if ($conn) {
    echo "Connexion établie avec succès. USER existe";
}

} else {
    echo "Échec de la connexion.";
}
```

# template en php :

```
function cvput($name, $education, $work, $skill1,$skill2,$skill3,$conn){  
  
    $sql = "INSERT INTO cv1 (mail,name, edu, work, skill1, skill2, skill3) VALUES (?, ?, ?, ?, ?, ?, ?);";  
    $stmt = $conn->prepare($sql);  
    $stmt->execute(["",$name, $education, $work, $skill1,$skill2,$skill3]);  
  
}
